1. Introduction

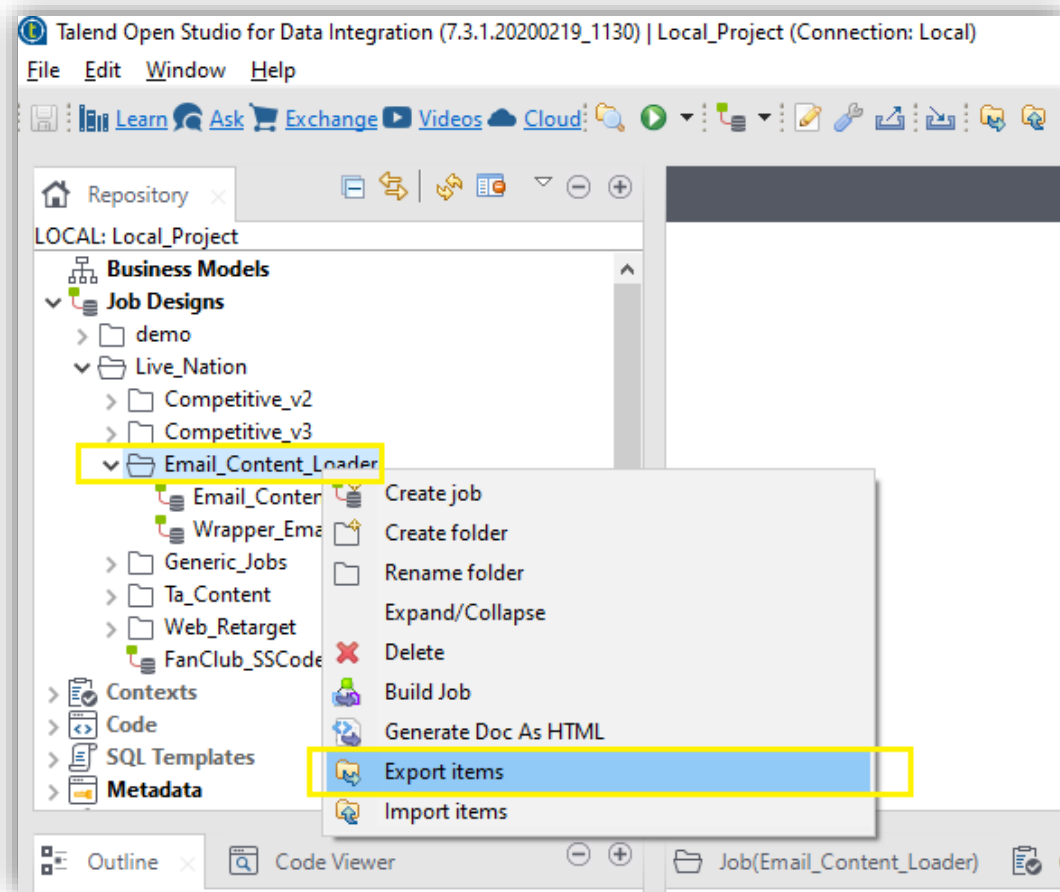

LeapLogic Assessment profiles existing inventory, identify complexity, lineage and provides comprehensive recommendations for migration to modern data platform.

2. Talend job extraction

LeapLogic requires Talend jobs exported in zip/item format. Below are the steps for exporting all objects from any Talend Repository.

Follow the below given steps

- Open Talend Open Studio and login to the required repository
- Browse to your job folder, Right click and select Export items

- Give the export **Zip Path/Name**, select the **folder/Jobs** you want to export, Click on **Export Dependencies** (This will include all related child jobs used in main job being exported), Click **Finish**
