## 1. Introduction

LeapLogic's Assessment profiles existing inventory, identifies complexity, draws lineage and provides comprehensive recommendations for migration to modern data platform.

## 2. SSIS Package Extraction

LeapLogic requires SSIS packages to perform an assessment. Follow the below given steps to achieve the same.

1. Use the path below where SSIS packages are stored. Usually, this location is configured when a new project is created. Refer to the location in the screenshot below.

**Configure your new project**

Integration Services Project

Project name

Integration Services Project1

Location

C:\Users

Solution

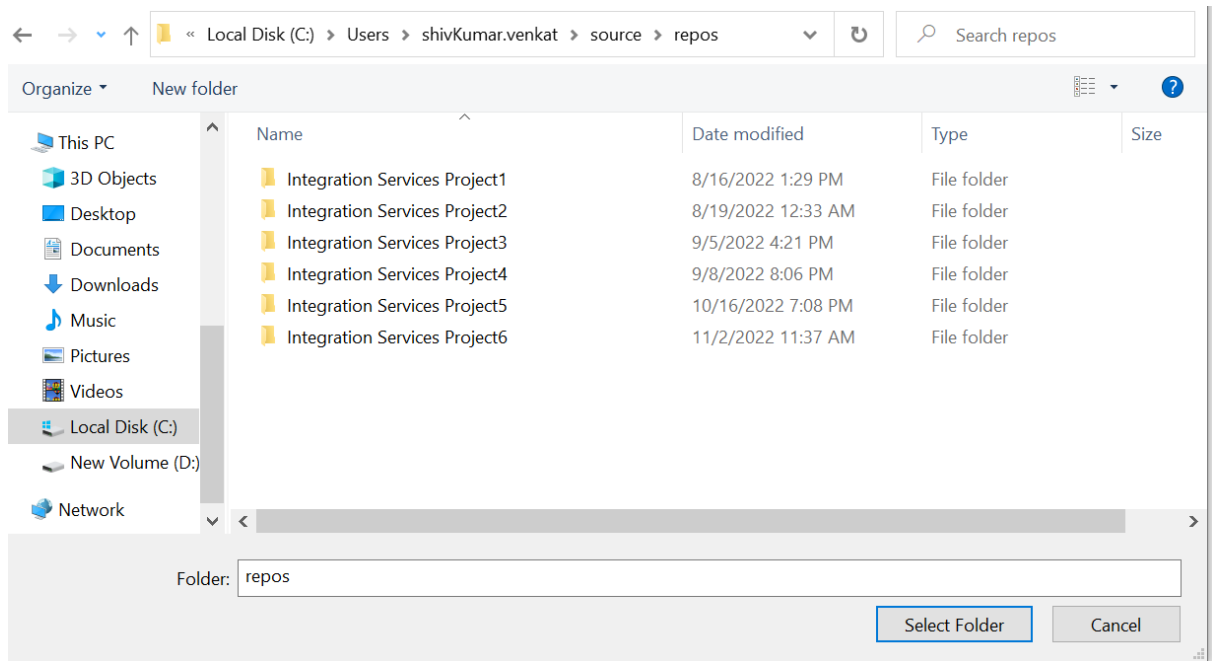

Create new solution

Solution name ⓘ

Integration Services Project1

☐ Place solution and project in the same directory

2. Go to the path C:\Users\<SystemName>\source\repos. You'll see all SSIS packages at this location.

3. Archive the packages and share them.

### 3. Getting Help
